

Custom Home in Greenwich  
Completed September 2009

*This project in Greenwich, Connecticut* designed by renowned New Canaan architect Robert Dean, for a discerning client, required a large quantity of natural stone, particularly exclusive Italian White marbles. In addition to the extra large kitchen and master bathroom, there were half a dozen other bathrooms, a billiards room and two powder rooms.

Meticulously searching yards in Italy and USA, we arranged for a set of tiles and slabs to meet the project requirements.

A large quantity of Premium Calacatta, Statuary and Blue Macauba tiles were sourced for this project.

Similarly, premium, hard to procure Calacatta marble slabs in 2" thickness for Kitchen and butler's pantry were sourced.

For the shower in master bathroom, full panels of Calacatta marble in a book-match pattern was used. In addition to master bathroom tub-deck, 3 other bathroom tubs were similarly topped in Calacatta and Statuary marble.

All of the custom fabrication and the installation was done by our crew, over a period from February thro' September, 2009.
